HARDY

ALNWICK | ENGLAND

With a tradition of innovation founded in 1872, Hardy has held no less than 10 royal warrants, countless patents and industry accolades and, more importantly, the trust of its loyal anglers for almost 150 years.

This tradition and heritage still underpins everything we do today at Hardy, where our latest generation of highly skilled craftsmen, designers and engineers still pursue the same end goal as their predecessors – to make your precious time on the water, richer more enjoyable and more successful.

From the iconic *Perfect* reel—still in production over 120 years after its development—to our highest performing rods using the industry changing SINTRIX silica nano material, Hardy tackle is designed and developed to be at the forefront of your angling adventures.

ULTRALITE® X

There are adverse conditions that place a different set of demands on our equipment — extreme weather, extreme distance, or even extreme flies. The Ultralite X is the answer to those demands and is significantly faster than our standard Ultralite. The high recovery rates drive tight loops with even the largest flies. The more powerful butt section is built for lifting deep sunk lines, pressuring large fish away from snags, and handling density compensated fly lines with aggressive tapers.

- SINTRIX® NSX combined with a greater percentage of high modulus carbon fiber
- Rapid taper blank design maximises material performance
- Ceramic lined titanium recoil guides
- Rod of choice for high performance situations

ULTRALITE®

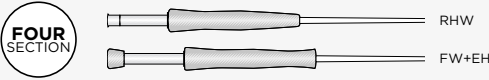

The Ultralite range of fly rods feature SINTRIX® NSX. SINTRIX® NSX is based on our industry changing SINTRIX® technology now combined with a secondary classified additive that allows much lower prepreg weights to be achieved.

This lighter weight material allows targeted modification of the blank design without affecting the blank’s strength. The net result is lighter, more responsive blanks that allow the angler to “feel” the line more during the casting stroke giving a greater degree of control than ever before.

The reel seat on the Ultralite is a masterpiece of form and function – moving more of the rod’s weight percentage behind the hand gives incredible in-hand balance, single start threads resist the reel loosening under heavy use and a keyed body further ensure a snug fit for your reel.

- SINTRIX® NSX our highest grade refinement of the industry changing SINTRIX® material
- Laser engraved reel seat with line size
- Ceramic lined titanium recoil guides
- Fully redesigned blanks

ULTRALITE® LL

Never before have light line and river specific anglers had so many advanced techniques to choose from. The surge in popularity around advanced European style and competition style techniques has to some degree left rod design behind. Not any more.

These technique specific rods have been designed, developed, and tested by some of the leading exponents of modern light line methods to represent the most refined and usable actions on the market for these demanding styles of fishing.

- SINTRIX® NSX combined with a greater percentage of high and high intermediate modulus carbon fiber
- Lightweight blank design maximises line feel and sensitivity
- Down locking reel seats on key sizes for balance improvement
- Ceramic lined titanium recoil guides
- Rod of choice for highly technical situations

ULTRALITE® SR

We are pleased to announce the addition of these small river rods to the award winning Ultralite range. The SINTRIX® NSX material is the perfect mix for a crisp rod that protects light tippets and gives you a forgiving, easy loading action for the accuracy and control you need in a small river or stream. The new range includes 6-piece packing rods for some great distancing off the trail.

- SINTRIX® NSX construction
- Optimum blend of finesse and power for small stream techniques
- Ceramic lined titanium recoil guides
- Lightweight reel seat
- Supplied in a hard travel tube

NEW '21

ULTRALITE® DH

The old saying, "two hands are better than one" could have been invented for the Salmon and Steelhead angler, but there's never been more ways to catch fish with a two-handed set-up than today. All anglers, including Trout and saltwater, are discovering the inbuilt advantages of the "long rod." The ability to cast heavy, wind resistant flies for great distances with ease, and more importantly, control them when they reach the target, has opened up new possibilities. The new, comprehensive range of Ultralite two-handed rods bring increased levels of feel, in-hand balance, and all-important fish fighting power when you need it most.

- SINTRIX® NSX construction
- Application specific action design
- Ceramic lined titanium recoil guides
- Aluminum and carbon custom reel seat
- Supplied in a hard travel tube

ZANE PRO

The Zane Pro rod continues Hardy’s premier position with high performance salt water fly rods. Using the finest high modulus carbon fibers and the best SINTRIX 440 resin system, the rod diameters have been reduced for less resistance in the wind and for greater accuracy. The guides are the latest generation of ceramic lined recoil titanium stripper guides and snakes. The bar stock aluminum reel seat has been hardened to the highest-grade anodization to ensure it is scratch resistant. The Zane Pro is proving itself to be the most durable, precise, and successful rod with wins for Tarpon and Permit anglers in this year’s game fish tournaments in the Keys.

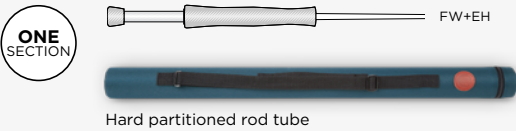

- Low profile, more responsive blank design
 - Ceramic lined titanium recoil guides
 - Hard anodised reel fitting
- Legendary strength to weight ratio of SINTRIX® 440
 - 4 or 1 section design for the ultimate in performance or convenience

ZANE

Based on the blank design of the award winning Proaxis series of rods, the all new Zane series brings performance, durability and refinement in a range of lengths and line sizes to suit all saltwater and predator anglers. Two all new 8ft, 8 and 9 weights ideal for backcountry Snook, predator fishing or even streamer-eating Trout in smaller rivers.

- Totally re-designed blanks based on the award-winning Proaxis series
 - Ceramic lined titanium frame guides
 - Salt safe anodized reel seat
- Strength to weight ratio of SINTRIX® 330
 - 4 section design for the ultimate in performance and convenience

NEW '21150 ANNIVERSARY LIGHTWEIGHT

When we looked through Hardy’s history to find the best tackle to commemorate our 150th anniversary, it was quickly agreed that the *Lightweight* series in the 1970 edition was the correct choice to reissue. A series that is a true Hardy original, and also price accessible, ensures the broadest participation in our celebration of Hardy.

The full range is being reissued with a nickel silver double screw line guide, raised spindle casing, and a collectable leather reel bag. The line guard is marked with an engraved commemorative dating of 1872-2022 and will only be sold through December 2022.

- Celebrating 150 years of the Hardy brand
- The iconic Lightweight series manufactured in bar stock aluminum
- Classic two screw line guard
- Commemorative engraving
- Supplied in a soft leather reel case

WIDE SPOOL PERFECT®

Beautiful classic fly reels, the latest revision in over a century of the Perfect. This model features a time proven check system and that classic Perfect sound, hand-crafted in Alnwick, England.

Ever since Forster Hardy was first granted a full patent for the Perfect reel design in 1889, our engineers have been constantly striving for ways to improve on perfection, tweaking and adjusting to bring you what we believe are the best reels in their class to date. After all, if we offered anything less, it would not be a Perfect.

- Time proven, adjustable check system with that traditional 'Hardy sound'
- Wide Spool design increases line capacity
- Stainless steel ball bearings provide frictionless running
- Engineered from bar stock aluminium with naval brass 1 piece spindle
- Deep anodised for strength and durability; smooth gunmetal grey satin finish
- Ivoryine handle
- Easily changed from left to right hand wind
- Supplied in a soft leather, sheepskin lined reel pouch
- Available in 6 sizes, including the traditional Taupo 3 7/8 inch

BOUGLÉ

Launched in 2013 to celebrate the reel’s 110th birthday, this Bouglé is one of the best yet – with its rolling pillar; reversible click check; naval brass bush and spindle; and its hand polished, deep anodised ‘pearl silver’ finish. This Bouglé reel is already one of the classics.

Made by time served Hardy Bros. reel makers here in Alnwick, England, this Bouglé reel comes presented in a beautiful, UK made, soft leather, sheepskin lined reel case.

- Sweet sounding, wide ranging check system
- Naval brass bush and spindle
- Deep anodised bar stock aluminum in Pearl Silver finish
- Easily changed from left to right-hand wind
- Spools interchangeable with Bouglé Mk VII, VI, V and IV
- Supplied with Hardy Bros. soft leather, sheepskin-lined reel pouch

1939 BOUGLÉ

The original Bougle was last produced in 1939, and many collectors believe the reel reached both its functional and aesthetic apex, even though few reels were produced that year. Now, the new 1939 Bougle Heritage Reel pays homage to those rare originals. The new reels feature the time tested Mark II check mechanism and are finished with a dark gun metal anodization, reminiscent of the original. The 1939 Bougle Heritage Reel is available in the traditional trout sizes at 3” and 3 1/4” diameters. Additionally, and for the first time, they are offered in a 3 3/4” Olympic diameter, which is perfect for light Spey and Switch rods.

- Classic 1939 style Bouglé
- Stunning gunmetal color scheme
- 3 3/4 inch size for small Spey & Switch rods

MARQUIS® LWT

A remodelled classic Hardy fly reel. The Marquis was a mainstay of the Hardy line up for many years and this new edition features numerous improvements to the original including subtle updating of the classic style with an indented regulator button, increased porting and improved regulation range.

- Made in Alnwick, England
- Bar stock 6061 construction
- Improved range of adjustment
- Modified porting to reduce weight
- Updated yet classic styling
- Indented regulator button

ZANE CARBON

Designed for the flats angler, the Zane Carbon is a lightweight, large arbor, sealed disc drag reel capable of handling anything that’s thrown at it. Perfectly at home taming Bonefish or Sea Trout in its smaller sizes to Permit and Tarpon in the 10,000 and 12,000 sizes. The regulated hard indent drag system allows accurate drag settings to be applied quickly in the heat of battle.

- Barstock 6061 /carbon with non flash salt safe anodised finish
- Fully sealed multi pad disc drag with 10lb+ stopping power
- 340 degree regulated drag control with hard indents for fast accurate adjustments

ULTRALITE® MTX-S

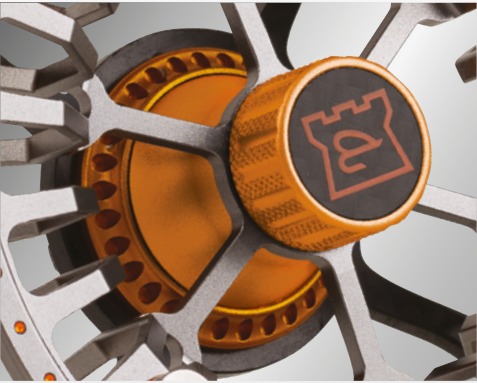

A bold step forward in reel design, the Hardy® Ultralite MTX-S is our first fly reel to feature a hybrid carbon fiber / alloy main frame construction with a sealed disc drag system. Strong, light and with a stunning industrial design, the MTX-S features a carbon fiber drag system, 340 degree color coded regulator, captive spool release and high line capacity.

- Hybrid carbon fiber / alloy main frame design
- Sealed carbon fiber disc drag system
- Stunning industrial design
- Color coded drag regulator

Ultralite MTX-S employs a **sealed disc drag system** designed to withstand sand, grit and water ingress.

ULTRADISC

A lightweight disc drag reel in its purest form, the all new Ultradisc features everything you need and nothing you don't in a disc drag fly reel.

With an innovative frame design this reel sets a new standard in lightweight performance reels whilst allowing the use of ultra thin fly lines and running lines as well as leader-only systems popular in modern river fishing. The scaled multi-pad drag system is also unregulated meaning fine adjustment of the drag pressure over a large window is possible.

- A new standard in lightweight disc drag reel design
- Multi-pad scaled disc drag system
- Unregulated drag system for fine adjustments
- Enclosed line guard frame design for use with leader-only systems and thin running lines
- The lightest disc drag reel ever produced by Hardy

NEW '21ULTRADISC CASSETTE

Hardy set new standards in 2008 with the introduction of the first high-end cassette reel system. The bar is raised yet again with the all new Ultradisc cassette reel.

The frame design allows significant weight saving as well as incorporating a built-in line guard design that effortlessly controls thin running lines. A full disc drag system provides ample stopping power with fine adjustment and the large arbor polycarbonate spools offer rapid line recovery. Finally, the re-introduction of the much loved CLS locking system offers simple, fast and reliable spool change time and again.

- Bar stock aluminum frame and spool carrier
- Durable polycarbonate spool
- Our lightest high performance cassette reel
- Full disc drag
- Fast & durable spool locking sytem

ULTRACLICK

A new standard in ultra light fly reels. The UCL series is our lightest ever fly reel, featuring a fully enclosed line guard for use with ultra thin line designs and leader-only systems. This series of reels is the ultimate for the light line aficionado. Fitted with an adjustable all-metal click system, this is the perfect reel for the lightest of applications.

- A new standard in lightweight reel design
- Adjustable all metal clicker system
- Enclosed line guard frame design for use with leader-only systems and ultra thin fly lines
- Push off spool release
- The lightest fly reel ever produced by Hardy

Greys fishing tackle is designed for the avid angler. Trusted the world over, Greys products set new standards for performance and quality.

Founded in 1968 as 'Greys of Alnwick' by passionate angler Malcolm Grey, the company quickly forged a strong reputation with anglers by launching a range of high performance mid-market fly rods.

Fly line, reels and apparel soon followed as well as market expansion into carp and sea fishing. These developments broadened angler awareness and established Greys as one of the most popular and respected fishing tackle brands in the UK.

TITAL

Greys all new flagship fly reel is fully constructed in bar stock aluminum and fitted with either a fresh or saltwater sealed disc drag system. As part of the new Greys fly reel design concept, it shares many design traits with the other reels in the range, including a stunning large arbor design, simple secure spool release, high level manufacturing and finishing techniques, and high performance drag system combined with the increased impact resistance of full bar stock construction.

- High quality bar stock, machine finished construction
- Sealed carbon disc drag system
- Modern large arbor industrial design
- Supplied with reel pouch

TAIL

NEW '21

TAIL

The Tail series of reels sets a new benchmark in design and are the latest addition to the Greys reel family. Constructed from durable, die-cast aluminum that undergoes two separate machining processes to remove excess metal and for a stunning, highly finished design.

The Tail is fitted with a carbon disc drag for a smooth and dependable drag.

Finished with an anodising pre-treatment plus a durable paint finish to ensure corrosion-free saltwater use, the Tail All-Water is fitted with a sealed all-water disc drag system generating over 10lbs of smooth drag.

Both reels feature an enclosed frame design to prevent line escape and; a rapid retrieve, large arbor design spool. More than a match for reels costing twice the price.

FIN

The Fin reels are the first range in the entirely new Greys reel family, a beautiful performance reel in a never before seen die-cast construction.

The Fin is constructed from durable injection molded aluminum that undergoes two unique machining processes to perfect and polish it to a stunning multi-color finish. The reels are fitted with a full rulon disc brake system that provides a sturdy smooth drag. The fully enclosed frame prevents line escape and is designed with a large arbor spool for rapid retrieve and line care.

Fin reels set a new standard in performance fly reels at an affordable price.

EURO NYMPH COMBO

A fantastic combo specifically designed for the challenges of modern Euro nymph fishing. This combo features a light flexible tip action rod that is balanced with the all new *Fin* fly reel and fitted with a purposefully designed level Euro nymph line.

Designed by Howard Croston—the current FIPS World Champion—this combo brings all he knows to the water.

Supplied with a handy rod/reel travel tube, this combo is the perfect start for the world of Euro style nymph fishing.

- High quality *Fin* 4 piece Euro nymph fly rod
- Downlocking reel seat
- *Fin* enclosed frame disc drag fly reel
- Low diameter Euro nymph fly line

GR80 STREAMFLEX

A favorite the world over, the Greys GR80 Streamflex range of rods lifts the bar again with upgraded actions and construction benefitting from the inclusion of Powerlux™ 1000 resin. Each rod is individually designed for the challenges of specific techniques from delicate dry fly work to technical Nymph styles. The new upgraded *Streamflex Plus* model with longer extension section creates the ultimate all round light line Nymph rod.

- Powerlux™ 1000 resin & high modulus carbon construction
 - Custom Greys reel seat with dual locking rings
- AAA cork handles
 - Section line up marks
 - Hard partitioned rod tube

BATTLE® FLY ROD

It’s all about the Battle.

Ready to handle the multiple species of saltwater fish when the opportunity arises, from stripers at the end of the dock to fishing from the beach, these rods help you battle fish that have an attitude. Four-piece #8 or #10 travel rods, delivered as open stock in a quality cloth rod sack, will take you in or offshore without a moment’s notice.

- 4-section, medium fast action blank
- Lined stripping guides and double leg snake intermediates
- Anodised aluminum reel seat with carbon spacer
- High quality, lightweight composite cork handle

Today, Fenwick's tradition of technology continues to meet the specialized needs of avid anglers. Contemporary fishermen are no longer generalists. They're specialists—bass fisherman, walleye fisherman, fly fisherman, saltwater fisherman—avid anglers who identify themselves by a specific technique or species. Fenwick's tradition of technology continues to drive its designers, engineers and pro staffers to develop sophisticated fishing rods specifically designed for specialized applications. It's why, for over half a century, Fenwick rods have been known, and will always be known, as "the most thought-out fishing rods in the world."

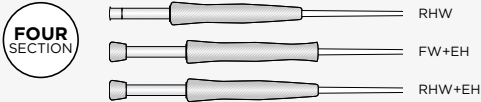

AETOS

The next generation of AETOS™ fly rods includes extensive range of high performance, modern fly rods including single handed, double handed and switch models.
