General Care

The same method of cleaning is valid for all reels in the Fortuna Z reel range.

- 1— Remove line and backing to ensure any salt deposits are removed from the arbor, particularly the screw heads.
- 2— Remove the spool.
- 3— Flush away dirt by placing the spool and frame under a stream of water and remove all salt deposits to prevent corrosion. Brushing all slots, corners and indents with a soft brush.
- 4— Dry carefully with a lint free cloth.
- 5— Lubricate with a good quality oil or grease at the points illustrated in the diagrams.
- 6— Always ensure the spool axle threads are adequately greased.
- 7— Always turn the drag to the minimum setting when not in use to avoid compression of the pads and springs.
- 8— Always ensure the reel and line are dry before storing in the case or pouch.

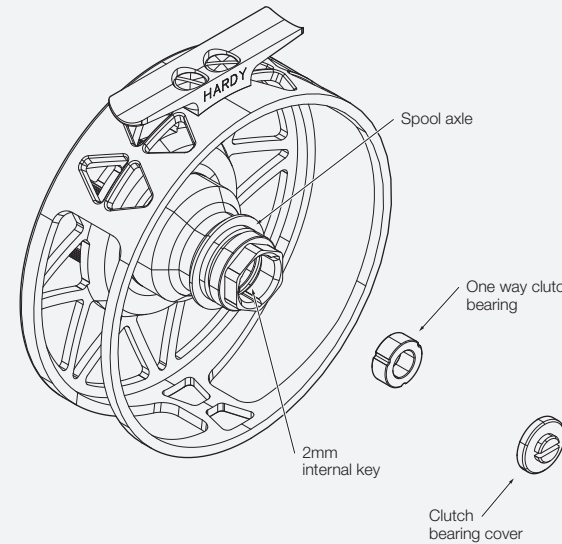

Change your reel from left to right hand wind

All Hardy Fortuna Z reels are designed to work in right or left hand wind. When you receive your reel, it will be set for left hand wind.

To convert your reel to right hand wind:

- 1— Remove spool from frame, unscrew the captive spool nut anti-clockwise. Set the spool aside.
- 2— Unscrew clutch bearing cover, turn anti-clockwise and remove.
- 3— Remove the one-way clutch bearing, do this by gently tapping the frame face down in the palm of your hand noting which way it comes out.
- 4— Rotate the one-way clutch bearing 180 degrees and replace back into the spool axle ensuring it lines up with the 2mm internal key.
- 5— Replace the clutch bearing cover turning clock-wise.
- 6— Replace the spool, your reel has now been converted from left to right hand.

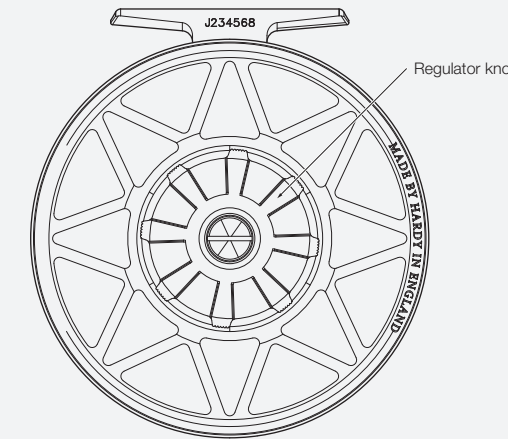

The reel has now been changed from left to right hand wind.

Fortuna Z Drag System

The drag mechanism can be adjusted simply by turning the regulator button clockwise to increase the drag or anti-clockwise to decrease the drag.

When the reel is not in use the drag should be set to the minimum setting.
